Detailed Action

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 8-11 are rejected under 35 U.S.C. 101 because Claims 8-11 fail to fall within a statutory category of invention. It is directed to the program itself, not a process occurring as a result of executing the program, a machine programmed to operate in accordance with the program nor a manufacture structurally and functionally interconnected with the program in a manner which enables the program to act as a computer component and realize its functionality. It's also clearly not directed to a composition of matter. Therefore, it's non-statutory under 35 USC 101.

Allowable Subject Matter

Claims 1-7 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: No prior art could be found, alone or in combination, at this time to teach the claimed steps of:

Art Unit: 2145

- preparing a first table containing, for each of said plurality of second servers, an address and a respective counter;
- dumping a copy of an address resolution protocol cache to a storage area to form a cache dump;
- determining, from said cache dump, which of said plurality of second servers are present in said cache dump and for each of said second servers present, incrementing a respective counter;
- after said determining and incrementing steps are completed, comparing said plurality of respective counters with each other to determine if a load imbalance between said second servers is greater than a threshold value; *and*
- if said load imbalance is greater than said threshold value, sending a message regarding said load imbalance.
